A thirst for innovation.

Topeak bottle cages are yet another example of our passion for quality. They feature a quick release for those got-to-guzzle moments, they’re made of carbon fiber for durability, they adjust to different bottle sizes and they even come in different colors.

**BOTTLE CAGE TECHNOLOGIES & FEATURES**

- **CARBON FIBER MATERIAL**
  A single piece of sculpted carbon fiber for maximum durability and ultra-lightweight.

- **ADJUSTABLE FIT**
  Adjustable design easily adapts to fit your needs. The height and diameter can be tailored to accept different sized coffee tumbler type travel mugs.

- **REVERSIBLE**
  Reversible design allows you to grab your bottle from either side easily and also ideal for smaller sized frames where bottle access can be challenging.

- **CAGEMOUNT**
  Allows any cage to be mounted to any handlebar keeping a water bottle close at hand or for an extra bottle when cycling in hot climates or for long distance touring.

- **CAGE TWIST**
  The X-15 adaptor fits between the cage and the bike frame and allows the cage to twist for easier access to larger bottles on smaller frame sizes.
